

Joist sway brace(SB-16 SB-12 SB-A) system

Protects deck investments

Greatly reduces lateral movement, reducing frame failure from sway and extending deck life. Hidden fasteners and screw down decks don't provide any protection from sway, causing loosening fasteners and connectors over time.

Patent pending

Straightens lumber

Aids in straightening out lumber, and is compatible with most dry systems on the market.

3 sizes in SB series

SB-16, SB-12, and SB-adjustable sizes accommodate most joist spacing, and install on new or existing decks. Ends deck sway

The SB series system creates a wedge between each joist, forming extreme anti-sway properties.
